Employee Management System (EMS)

Acceptance Test Planning Document

1. Purpose

The purpose of this Acceptance Test Plan is to verify that the Employee Management System (EMS) meets all functional, usability, performance, and localization requirements before deployment. The system will be accepted only if all acceptance criteria and test cases pass successfully.

2. Acceptance Criteria

2.1 Functional Criteria

Login and Authentication

- F1: User can create an account
- F2: User can log in with valid credentials
- F3: Failed login shows error message
- F4: Successful login redirects to dashboard

User Information Display

- F5: Upon successful login, the system displays the logged-in user's name and role in the left menu.
- F6: The correct user data must be fetched dynamically from the system.

Localization (Language Selection)

- F7: The language dropdown allows users to select from available options (English, Spanish, Persian, Arabic).
- F8: When a language is selected:
    - The system updates the interface language accordingly.
    - The selection persists across different pages.
- F9: The dropdown should expand and collapse properly when clicked.

- F10: RTL layout applies correctly for Persian/Arabic.’
- F11: Database stores multilingual data (UTF-8)

Navigation Links

- F12: Each menu item must correctly redirect the user to the respective module:
- **F13: Dashboard**: Loads the main overview page with system statistics.
- **F14: Employees:** Navigates to the employee management section.
- **F15: Departments:** Opens the department management page.
- **F16: Leave Management:** Displays leave requests and related functionality.
- **F16: Salary:** Redirects to payroll or salary-related information.
- **F18: Logout:** Logs the user out and redirects to the login page.

Navigation Behavior

- F17: The currently active page should be visually highlighted in the menu.
- F18: Navigation between pages should be smooth and without errors.
- F19: The menu must remain visible and consistent across all pages.

Logout Functionality

- F20: Clicking “Logout” should:
  - End the user session.
  - Clear authentication data.
  - Redirect the user to the login screen.
- F21: The user should not be able to access protected pages after logout without logging in again.

Dashboard

- F22: Dashboard displays correct statistics (employees, departments, payroll, leave)
- **F23: Quick Actions function correctly:**
    - Add New Employee
    - Create Department
    - Process Leave Request
    - Run Payroll
    - Generate Repor
- **F24: Department Overview**
    - Displays all departments with relevant details (department name, employees, status) and allows easy management.
- **F25: Salary Summary**
    - Displays accurate payroll information: total monthly payroll, Average Salary, Pending Salary and view full report about the salary.
- **F26:** Dashboard loads successfully after login without errors or missing components.
- **F27:** All dashboard elements (cards, buttons, sections) are responsive and function correctly when interacted with.

Employee Management

- **F28:** Employee Management page loads successfully without errors.
- **F29:** The search bar allows users to search employees by name or relevant keywords.
- **F30:** The “Add Employee” button opens a form and allows the user to successfully add a new employee.
- **F31:** Filters (Department, Gender, Contract Type) work correctly and update the employee list accordingly.
- **F31:** Employee statistics cards display accurate data (total employees, full-time, part-time, interns).

- **F31:** The system displays a list of all employees with correct details:
    - ID
    - Name
    - Department
    - Job Title
    - Start Date
    - Contract Type
    - Gender
- **F32:** The **“View”** action displays detailed information about the selected employee.
- **F33:** The **“Edit”** action allows updating employee information and saves changes correctly.
- **F34:** The **“Delete”** action removes the employee after confirmation and updates the list.
- **F35:** Pagination (Next/Previous) works correctly when navigating between pages of employees.
- **F36:** All buttons and actions respond correctly without errors or delays.

Department Management

- **F37:** Department Management page loads successfully without errors.
- **F38:** The search bar allows users to search departments by name or relevant keywords.
- **F39:** The “Add Department” button opens a form and allows the user to successfully create a new department.
- **F40:** Filters (Department, Capacity) work correctly and update the department list accordingly.
- **F41:** Department statistics cards display accurate data (total departments, active departments, total employees, average capacity).

- **F42:** The system displays a list of all departments with correct details:
    - ID
    - Department Name
    - Capacity
    - Number of Employees
    - Created Date
    - Description
- **F42:** The **“Edit”** action allows updating department information and saves changes correctly.
- **F44:** The **“Delete”** action removes the department after confirmation and updates the list.
- **F45**: Department can not be deleted if employees are assigned
- **F46:** Pagination (Next/Previous) works correctly when navigating between pages of departments.
- **F47:** All buttons and actions respond correctly without errors or delays.

Leave Management

- **F48:** Leave Management page loads successfully without errors.
- **F49:** The search bar allows users to search leave applications by employee name, leave type, or keywords.
- **F50:** Filters (Department, Leave Type) work correctly and update the leave list accordingly.
- **F51:** The “+ Add Leave” button opens a form and allows the user to successfully create a new leave entry.
- **F52:** Leave statistics cards display accurate data:
    - Total Leaves
    - Currently On Leave

    - Sick Leaves
    - Average Duration (days)
- **F53:** The system displays a list of all leave applications with correct details:
    - ID
    - Employee Name
    - Duration (days)
    - Start Date
    - End Date
    - Leave Type (Vacation, Sick, Personal, Maternity, etc.)
    - Reason
- **F54:** The **“View”** action opens a detailed view of the leave application.
- **F55:** The **“Edit”** action allows updating leave information and saves changes correctly.
- **F56:** The **“Delete”** action removes the leave entry after confirmation and updates the list.
- **F57:** Date fields validate correctly (Start Date can not be after End Date).
- **F58:** Leave duration is calculated accurately based on selected dates.
- **F59:** UI updates dynamically when filters or search queries change.
- **F60:** Pagination (Next/Previous) works correctly when navigating between pages of leave applications.
- **F61:** All buttons and actions respond correctly without errors or delays.

Salary Management

- **F62:** Salary Management page loads successfully without errors.
- **F63:** The search bar allows users to search employees by name or relevant keywords.
- **F64:** The **“Run Payroll”** button triggers payroll processing without errors and updates salary records accordingly.

- **F65:** Filters (Department, Job Title, Position) update the salary list dynamically (if implemented).
- **F66:** Salary statistics cards display accurate data:
    - Total Monthly Payroll
    - Average Salary
    - Highest Salary
    - Employees Paid
- **F67:** The system displays a list of all employees with correct salary-related details:
    - ID
    - Name
    - Department
    - Job Title
    - Position
    - Salary
    - Gender
- **F68:** The **"View"** action opens a detailed salary record for the selected employee.
- **F69:** The **"Edit"** action allows updating salary information and saves changes correctly.
- **F70:** Salary values validate correctly (no negative salary, no empty fields, numeric-only).
- **F71:** Salary updates reflect immediately in the statistics cards (Total Payroll, Average Salary).
- **F72:** The system prevents editing salary fields if the user does not have the required permissions (if role-based access is implemented).
- **F73:** Currency formatting is consistent across the entire page (e.g., €5000).
- **F74:** Pagination (Next/Previous) works correctly when navigating between pages of salary

- records.
- **F75:** All buttons and actions respond correctly without errors or delays.

2.2 Performance Criteria

- P1: All pages load within **2 seconds**
- P2: UI responds to user actions within **1 second**
- P3: Database queries return results within **1 second**

2.3 Usability Criteria

- U1: User can navigate without guidance
- U2: Dashboard layout is clean and readable
- U3: Localization does not break layout
- U4: RTL languages display correctly
- U5: Forms are intuitive and validated

3. Acceptance Test Cases

Below are the final updated test cases that match the real system.

3.1 Functional Test Cases

TC-F1: Admin Registration (Sign up)

- **Requirement: F1**
- **Pre-condition: Registration page is accessible**
- **Steps:**

    1. Open the registration page

2. Enter valid company information
3. Enter valid admin details (first name, last name, email, gender, password)
4. Click Create Account

TC-F2: Login with Valid Credentials

- **Requirement:** F2
- **Pre-condition:** Admin account exists
- **Steps:**
    - Open login page
    - Enter valid email + password
    - Click “Sign In”
- **Expected Result:** Dashboard loads with user name and role displayed.

TC-F3: Login with Invalid Credentials

- **Requirement:** F3
- **Steps:**
    - Enter wrong password
    - Click Sign In
- **Expected Result:** Error message appears: “Invalid credentials.”

TC-F4: Dashboard Loads Correctly

- **Requirement:** F22-F27
- **Steps:**
    - Log in
    - View dashboard

- **Expected Result:** Statistics match database values:
    - Total Employees
    - Active Employees
    - On Leave
    - Departments
    - Payroll summary

- **Expected Result:** Employee saved; table updates; success message shown.

TC-F5: Create Employee

- **Requirement:** F28, F30
- **Steps:**
    - Click “Add Employee”
    - Fill all fields
    - Submit
- **Expected Result:** Employee saved; table updates; success message shown.

TC-F6: Update Employee

- **Requirement:** F28, F33
- **Steps:**
    - Click “Edit” on an employee
    - Modify fields
    - Save
- **Expected Result:** Updated data appears in table.

TC-F7: Delete Employee

- **Requirement:** F28, F34
- **Steps:**
    - Click “Delete”
    - Confirm deletion
- **Expected Result:** Employee removed; table refreshes.

TC-F8: Create Department

- **Requirement:** F37, 42
- **Steps:**
    - Click “Create Department”
    - Enter name, capacity, description
    - Save
- **Expected Result:** Department appears in table.

TC-F9: Delete Department with Employees

- **Requirement:** F37, F44, F45
- **Steps:**
    - Attempt to delete IT department
- **Expected Result:** System blocks deletion with message: “Cannot delete department with assigned employees.”

TC-F10: Add Leave Record

- **Requirement:** F48, F51
- **Steps:**
    - Click “Add Leave”
    - Fill form
    - Submit
- **Expected Result:** Leave appears in Leave History.

TC-F11: Run Payroll

- **Requirement:** F62, 64
- **Steps:**
    - Click “Run Payroll”
- **Expected Result:** Payroll summary updates; no errors.

TC-F12: Switch Language (English → Persian)

- **Requirement:** F7, F8, F9, F10
- **Steps:**
    - Open language dropdown
    - Select Persian
- **Expected Result:**
    - All UI text becomes Persian
    - Layout switches to RTL
    - No broken UI elements

TC-F13: Database UTF-8 Localization

- **Requirement:** F11
- **Steps:**
    - Create employee with Persian/Arabic name
    - Save
    - Reload page
- **Expected Result:** Name displays correctly (no characters).

3.2 Performance Test Cases

TC-P1: Page Load Time

- **Requirement:** P1
- **Steps:**
    - Navigate to Dashboard
- **Expected Result:** Loads < 2 seconds.

TC-P2: Table Filtering Response

- **Requirement:** P2
- **Steps:**
    - Filter employees by department
- **Expected Result:** Table updates < 1 second.

3.3 Usability Test Cases

TC-U1: Navigation Intuitiveness

- **Requirement:** U1
- **Steps:**

- Ask user to find “Leave Management”

- **Expected Result:** User finds it without help.

TC-U2: RTL Layout Validation

- **Requirement:** U4
- **Steps:**
  - Switch to Arabic
- **Expected Result:** All UI elements align right; no overlap.

4. Coverage Matrix

User Story	**Requirements**	**Test Cases**
Login	F1-F6	TC-F1, TC-F2, TC-F3
Dashboard	F7-F27	TC-F4
Employee	F28-36	TC-F5, TC-F6, TC-F7
Department	F37-47	TC-F8, TC-F9
Leave Management	F48-F61	TC-F10
Salary	F62-F75	TC-F11
Localization	F7-F10	TC-F12
Database Localization	UTF-8	TC-F13
